A Golden Occasion

The 50th edition of Biennale Interieur in Kortrijk, Belgium was not just a show, but an elegantly curated exhibition that investigates the importance of interior design.

Elephant chair | [Per/Use](#)

Designed by Charly Cnops of Studio SPONC, the chairs' name refers to the animal with its characteristic shape of trunk and ears. The continuous line of the tubular metal frame gives it a contemporary and playful look. The separate seat and backrest work as two independent pieces and are now available with black or white metal base and oak or walnut seating and back rest.

Loop | [Per/Use](#)

The Loop is a collection of lights designed by Filip Janssens now available as a standing desk lamp with a metal base on which a vertical panel in wood or marble is turning, holding a metal ring with the light source and capturing the electric cable in a fixed loop. The ring and base are custom made brass pieces and the pivoting vertical part consists of a solid, oiled oak panel, or marble such as calacatta or fior di bosco, as a contemporary reinterpretation of an Art Deco desk lamp.
